### Super durable powder coatings for long lasting and impressive surface finishes

Super durable powder coatings ensure the corrosion resistance and improve the resistance and aesthetic appeal of the final product.

Finishes that are presented on this board are made with Super durable powders which meet the demanding weathering requirements of the leading industry specifications Qualicoat Class 2. By choosing Super durable powder coatings, your design will be both contemporary and long-lasting, keeping its stylish appearance for many years to come.

ALUMIL Group has a deep knowledge of the techniques and the equipment that are suitable for efficient powder coating and its powder coating lines are certified according to the international standards GSB, Qualicoat and Seaside Class. Moreover, the company is using chrome free powders that are free from toxic hardener TGIC, in alignment with its respect to people and the environment.
